L50041-F613-A100	Standard WLAN Implementation * Remote Delivery * Siemens Consultant Hosts conference call with VAR to review scope of work, implementation process, and to gather technical information and step through checklits. * Remote Configuration Services for up to 30 access points * Additional Access Points must be added with the Simple Access Point Offer * Single site. One building or location. * Larger/complex implementations are custom priced and are not included in this offer * Assumes pre-existing RF survey performed by VAR or customer. * Assumes Radius server is installed, if applicable Additional access points are added in increments of 10 by selecting the Simple Access Point installation offer				$1,400.00 $225.00 per hr.		$2,550 Fixed fee.	
L50041-F613-A101	Incremental Standard Access Point Implementation * Remote delivery * To be used with Standard WLAN Implementation or when access points are added to an existing standard implementation * Offered in 10 access point increments						$525	
L50041-F613-A102	Complex WLAN Implementation * Multi-site implementations * More than two controllers * Integration of multiple wireless technologies (mixed manufacturer wireless solution) * Assumes floor plans are available in CAD file format * On-site implementation * Required if WLAN carries voice traffic * HPWM and Advanced inclusion * Professional Project Management * Configuration of all controllers and access points * Includes Radius server implementation, if required						Custom priced	
L50041-F613-A103	Incremental Complex Access Point Implementation * More than one physical client location/building * More than two controllers and 60 access points in existing configuration * Required if WLAN used for voice or there is integration of multiple wireless technologies and solution providers * Remote delivery * Standalone offer * Sold in 10 unit increments						$875	
L50041-F613-A104	Voice over IP Network Readiness Assessment * Study and assess the customer's network from the top down to determine its readiness for supporting real time voice traffic. * The readiness assessment substantially increases the probability that the planned VoIP project will be successful by identifying potential problem areas, such as inadequate bandwidth, poor network design, lack of traffic prioritization, and insufficient network electronics. * Consultants analyze traffic in the context of current and planned call volumes and traffic patterns to determine the impact of the voice traffic on the IP network. * Base services include the standard data gathering activities followed by analysis and written reports. Optional services include follow up verification the recommended changes have been implemented. * A comprehensive written report is provided, which identifies critical and non-critical risk areas and recommends a course of action to address those risk areas * Required for any/all Voice over IP (VoIP) deployments. * Traffic generation to simulate traffic load and evaluate adequate network performance. * Must provide network device configuration details including number of WAN and LAN interfaces per location						$1400 per day Three days average time	
L50041-F613-A105	CAD Site Design * Requires VAR-provided electronic floor plans * Uses industry leading analysis tools to optimally place access points						$1050 for first floor up to 20K feet $.03 per additional square foot
